IX

Forum of Latin American DEMOCRACY

Challenges of Politics and Democracy in a Digital Era

Palacio de Minería, April 4-5, 2019

Peter Wolf

Technical Services Manager for the Electoral Processes and Constitution-Building programmes at International IDEA. His research and work focuses on the application of information and communications technology (ICT) in elections and online networking, with a special emphasis on sustainable and trusted implementation of technology in electoral processes. He was part of the Elections Department of the OSCE Mission to Bosnia and Herzegovina, and has served in various international election observation missions as voter registration and electronic voting expert in France, Kazakhstan, Kyrgyzstan, Venezuela and the Philippines. He has also worked as a consultant and expert in election related ICT projects in Albania, the Democratic Republic of the Congo, and Iraq, as well as work for private sector technology companies in Austria, his natal country. Wolf is responsible for the Best Electoral System Test (BEST) tool and the ICTs in Elections Database, both available online. Wolf is the lead author of Introducing Electronic Voting: Essential Considerations, and contributor to The Use of Open Source Technology in Elections and Certification of ICTs in Elections.
